

Metro® Top-Track High-Density Storage Systems

When adding space isn't an option, the answer is to make your existing space more efficient.

Combines movable aisles and stationary end units — utilizing **all** available space.

- Mobile and stationary units attach to overhead tracks to increase storage capacity.
- Overhead track system compensates for uneven floors and makes access easy, with no underfoot tracks to stumble over or trap dirt.
- Eliminates the need for costly facility expansion.
- Available in a variety of sizes.

Super Erecta Single Deep Top-Track™ High-Density Storage System

Metro Fact:

Metro Top-Track systems can increase storage capacity up to 50% and more by eliminating unnecessary aisle space.
